STAGE LIGHTS

TYPES OF STAGE LIGHTS

LED PAR LIGHTS

- Used for stage wash, uplighting, and venue decoration.
- Energy-efficient with RGB/RGBW color mixing.

MOVING HEAD BEAM SHARPY

- Produces sharp, powerful beams for concerts and DJ events.
- Ideal for aerial effects and dynamic light shows.

MOVING HEAD BEAM WASH

- Creates wide, smooth color washes across the stage.
- Perfect for concerts, weddings, and corporate events

MOVING HEAD BEAM SPOT

- Projects focused beams, gobos, and patterns.
- Suitable for performances, live shows, and theatrical productions.

LED BLINDER

- High-intensity audience lighting for dramatic moments.
- Commonly used during concerts and live performances

STROBE LIGHT

- Produces rapid flashing effects.
- Ideal for DJ nights, festivals, and high-energy performances

FOLLOW SPOT

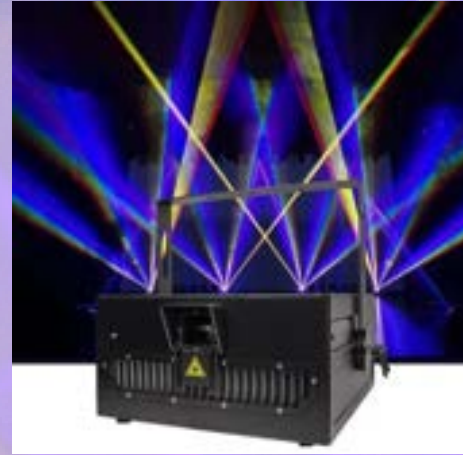

- Manually operated spotlight that tracks performers on stage.
- Best for singers, speakers, and stage productions.

PROFILE (ELLIPSOIDAL) LIGHT

- Delivers a precise beam with sharp edges.
- Used for theatre, conferences, and stage presentations.

LASER LIGHT

- Creates sharp, high-intensity laser beams and stunning aerial effects for concerts, DJ events, and stage shows.
- Ideal for enhancing live performances with dynamic patterns and vibrant visual effects.

UV BLACK LIGHT

- Emits ultraviolet light to make fluorescent colors and white materials glow brightly.
- Perfect for theme parties, concerts, stage performances, and special visual effects

A detailed view of a stage rigging system. The image shows a dense network of silver metal trusses forming a triangular and rectangular framework. Various stage lights, including large rectangular fixtures with multiple circular lenses and smaller spotlights, are suspended from the trusses. Cables and other rigging components are visible, connecting the structure. The background is a solid dark grey.

TRUSS & RIGGING

ALUMINUM BOX TRUSS

- **Description:** Standard aluminum truss used for stage lighting, LED walls, sound systems, and event structures

LED VIDEO WALL

INDOOR VIDEO WALL
OUTDOOR VIDEO WALL
CURVED LED WALL
MOBILE LED WALL

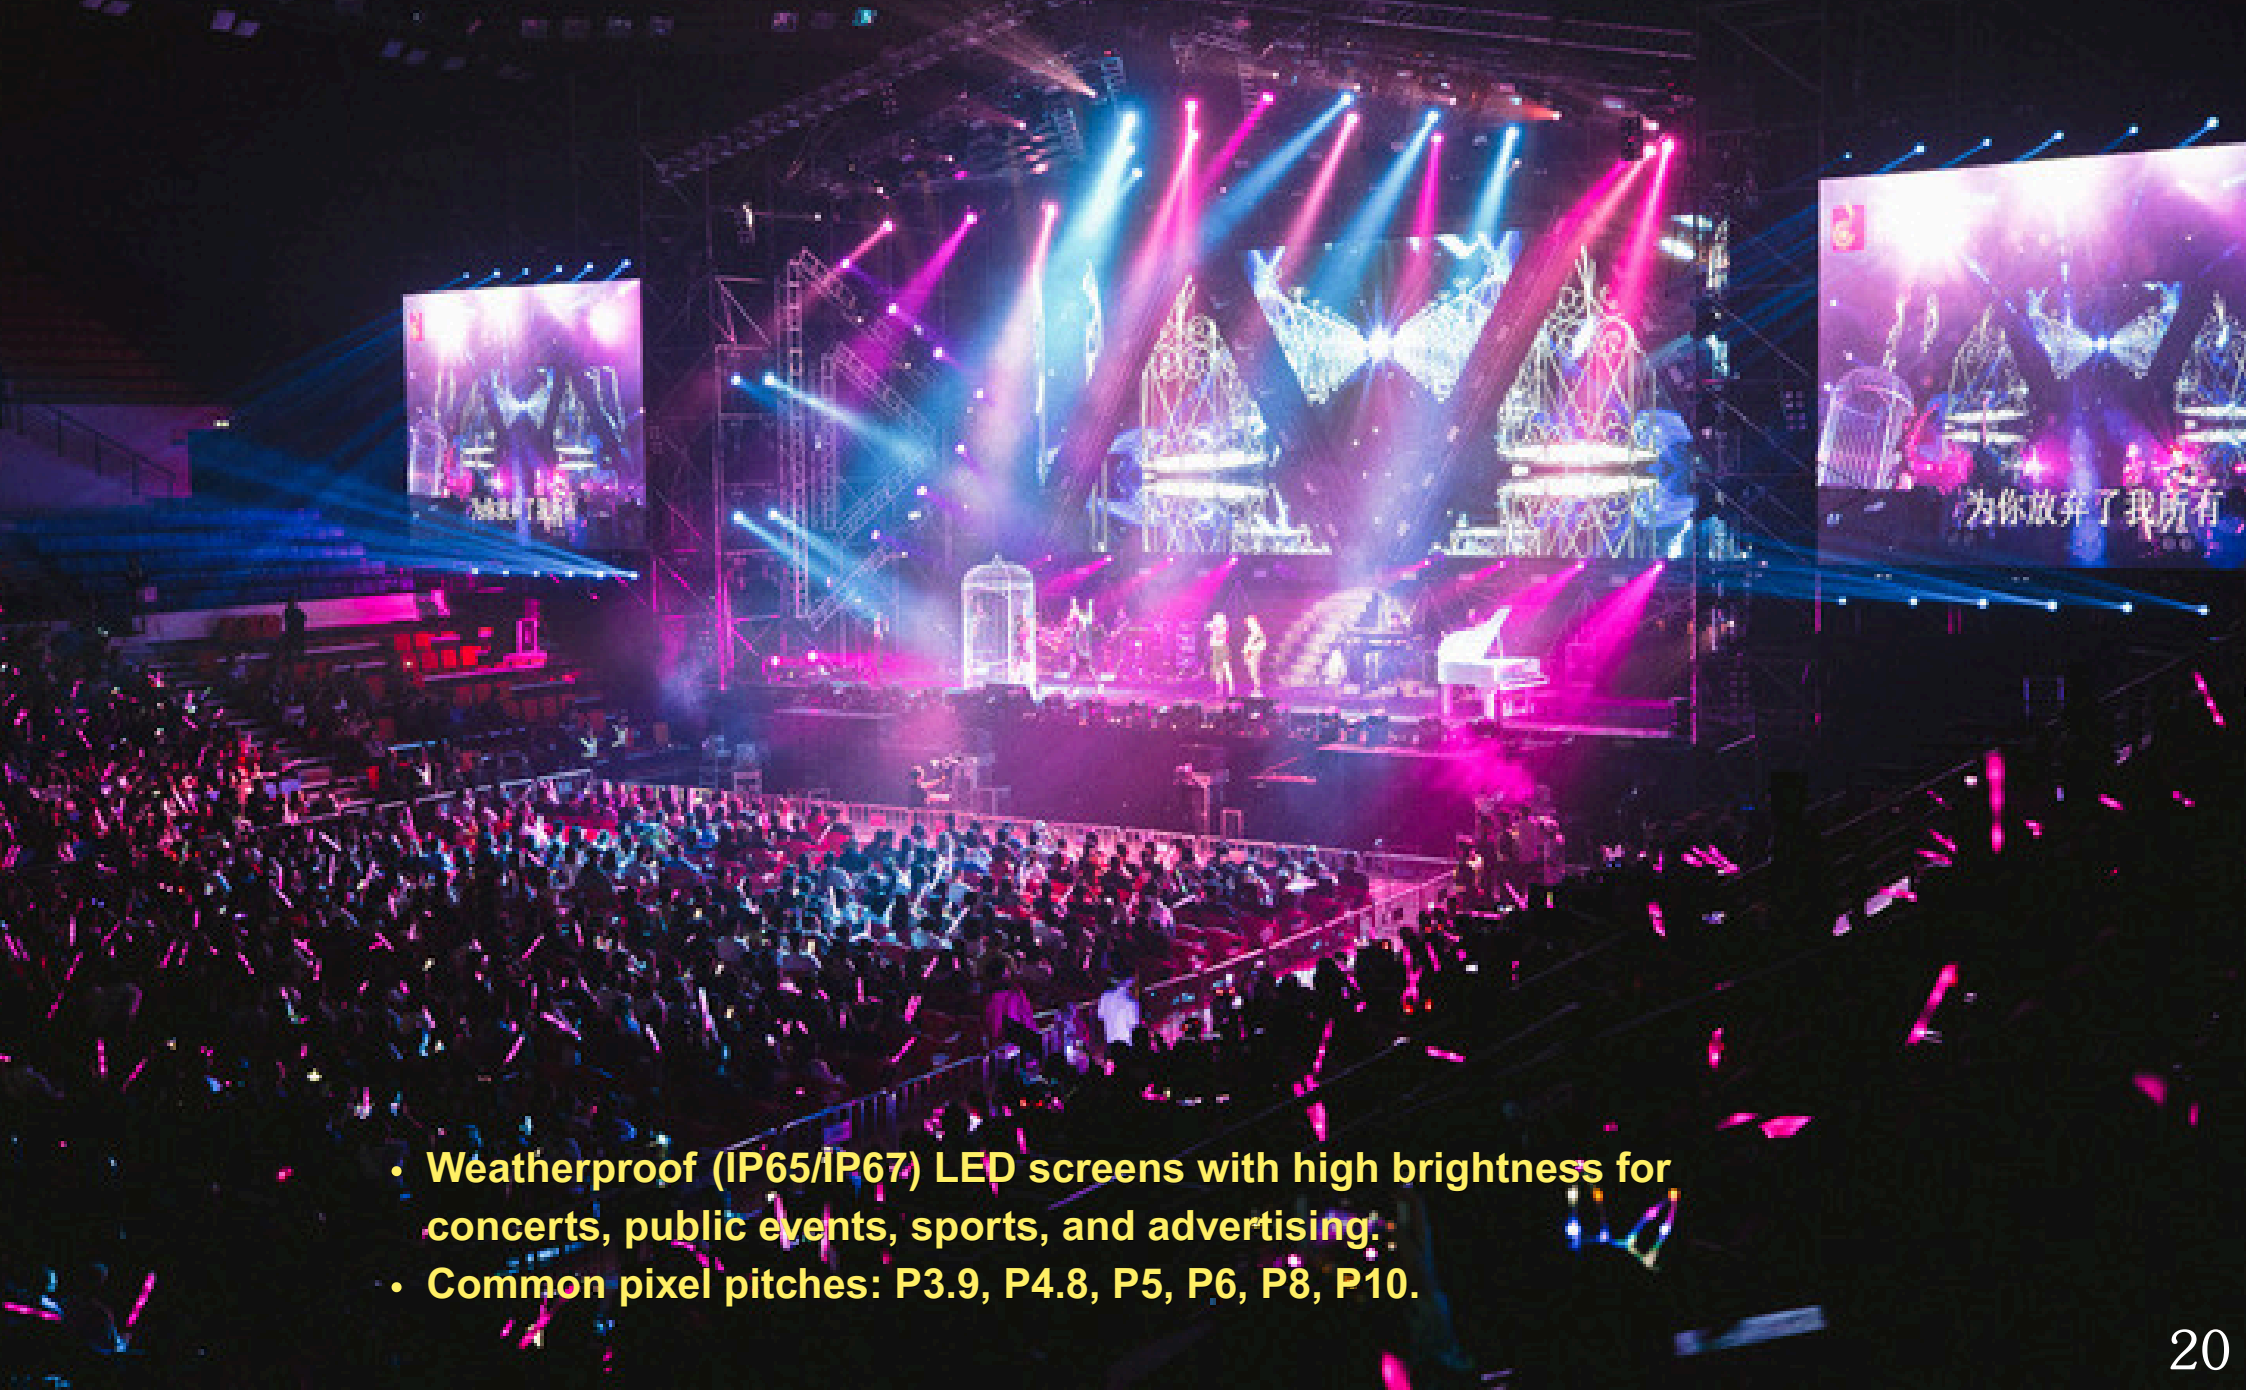

INDOOR LED WALL

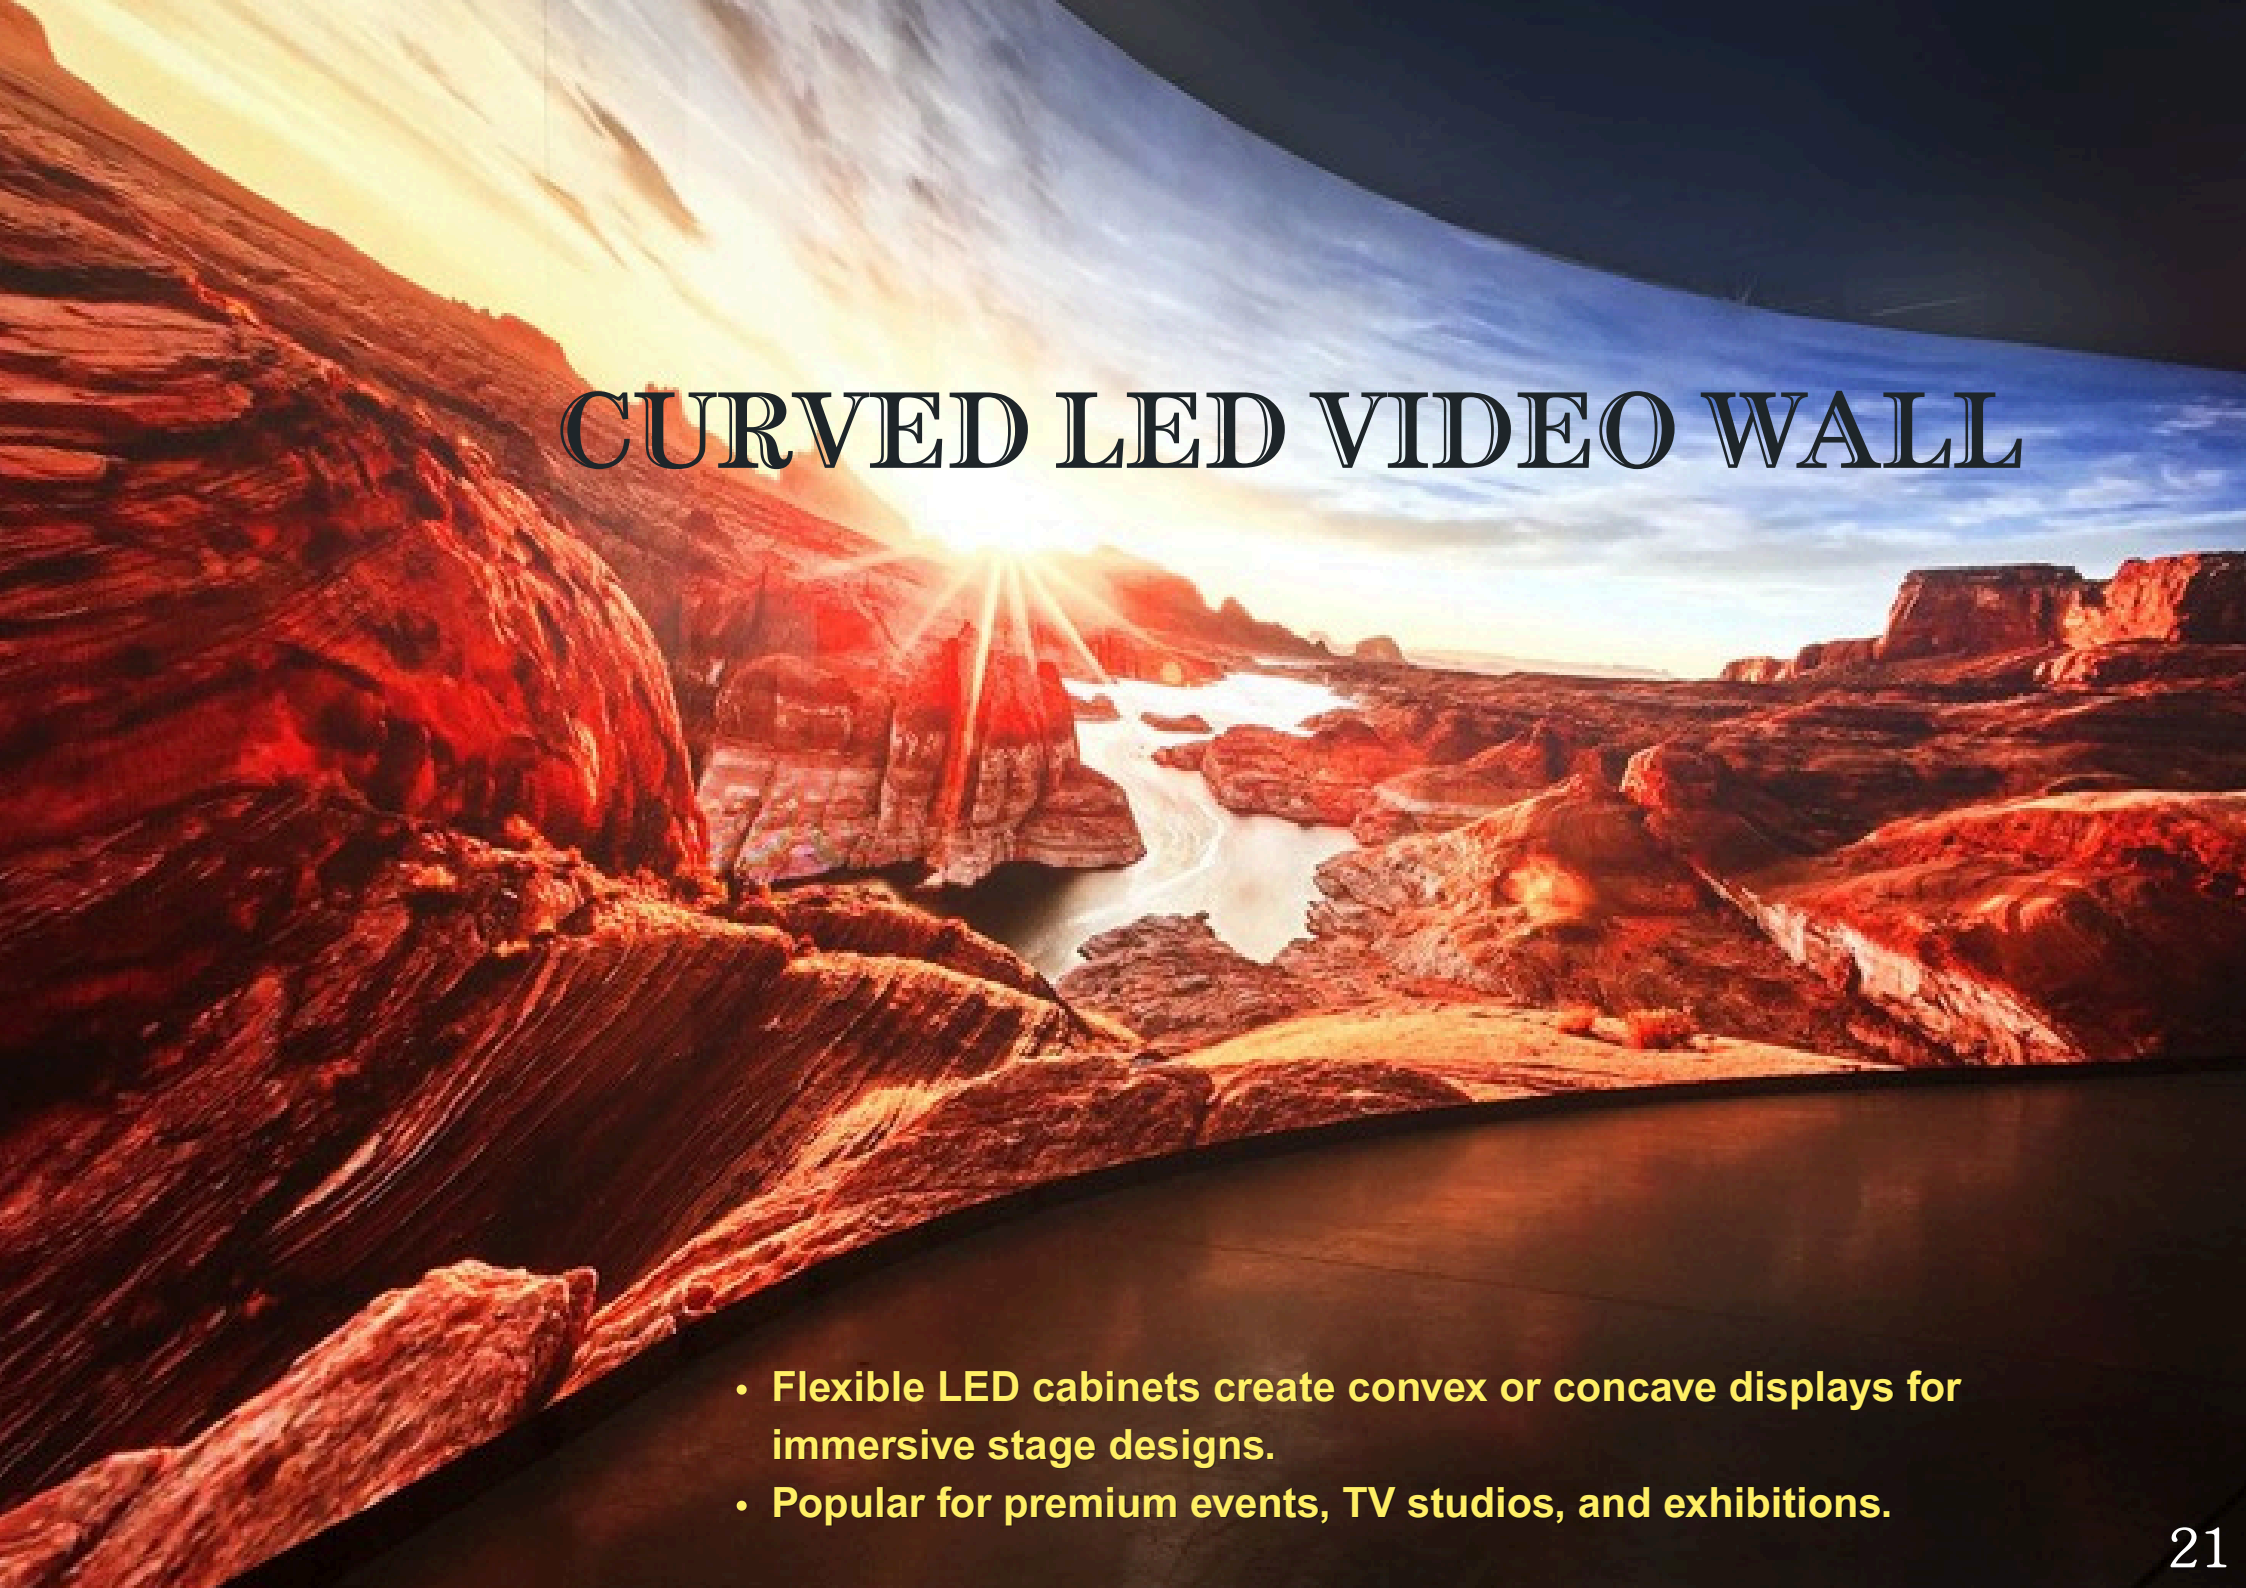

- High-resolution LED panels designed for indoor events, conferences, exhibitions, weddings, and auditoriums.
- Available in fine pixel pitches (P1.5, P1.9, P2.6, P2.9, P3.9).

OUT DOOR LED WALL

- Weatherproof (IP65/IP67) LED screens with high brightness for concerts, public events, sports, and advertising.
- Common pixel pitches: P3.9, P4.8, P5, P6, P8, P10.

A large, curved LED video wall is shown, displaying a vibrant and detailed landscape. The scene is a deep red rock canyon with a winding river in the center. The sun is low on the horizon, creating a bright glow and long, dramatic shadows across the canyon walls. The sky is a mix of orange, yellow, and blue. The video wall itself is curved, following the shape of the canyon, and its surface is composed of many small, rectangular LED panels. The overall effect is one of immersion and high-quality visual reproduction.

CURVED LED VIDEO WALL

- Flexible LED cabinets create convex or concave displays for immersive stage designs.
- Popular for premium events, TV studios, and exhibitions.

PROJECTOR & SCREEN

Albids®

- High-brightness projectors deliver crystal-clear visuals for conferences, weddings, exhibitions, product launches, and live events. Available in various brightness options to suit different venue sizes.
